

EDUCATION

University of Toronto – Toronto, ON

2021 - 2025

Honours Bachelor of Science with Distinction (Double Major in Computer Science and Statistical Sciences)

PROFESSIONAL EXPERIENCES

RBC Amplify Internship Program

May 2024 - August 2024

Software Developer Intern – Toronto, ON

- Collaborated with RBC mortgage team to create an end-to-end product to streamline mortgage application processes, projecting 2% increase in client conversion and \$11.5MM revenue by 2030 and achieving Overall Best Business Value Award (\$20,000)
- Utilized Retrieval Augmented Fine-Tuning (RAFT) for policy-trained text recommendations to create an internal-facing tool and reduce burden of manual tasks

Ministry of Children, Community, and Social Services (Children and Youth I&IT Solutions)

May 2023 - December 2023

Business Analyst Co-op – North York, ON

- Coordinated with development, design, and business teams in the migration of manual legacy Ontario healthcare systems to modern web application to enhance accessibility and efficiency and ensure data accuracy and security
- Lead the digitization of paper infant healthcare forms by structuring data fields for automated PDF generation and defining user flow
- Conducted regular user testing with 10+ healthcare agencies to identify pain points and optimize user interface

PROJECTS

Track The Crowd: Crowd Density Image Detection Project

January 2025 - April 2025

Backend Developer (CSC490 Capstone Project) – Toronto, ON

- Collaborated with Toronto Transit Commission (TTC)'s New Technology & Innovation team to integrate a low-cost, high efficiency computer based system to reduce crowds during subway boarding times
- Working with camera-based sensors and convolutional neural networks to detect how crowded a TTC subway train is in real-time to reduce crowds in public transit

Food Prediction Project

February 2025 - March 2025

Data Scientist (CSC311: Introduction to Machine Learning) – Toronto, ON

- Built a custom ML model using decision trees, regression, Naïve Bayes, and neural nets to predict food items from 2,000+ responses with 80.18% accuracy

Alfina Technologies: Trading Interactive Visualization Tool

September 2024 - December 2024

Front-End Developer, Project Manager (CSC301: Introduction to Software Engineering) – Toronto, ON

- Developed an interactive web application to simplify financial data analysis and strategy performance evaluation for traders without programming expertise
- Implemented a comprehensive trading rule building tool to allow users to gain trading insights through dropdown menus and flexible input components

Sticky Note Application Project: “Sticky”

January 2024

UofTHacks – Toronto, ON

- Developed an AI-assisted sticky note web app using JavaScript, HTML, and CSS, integrating Cohere NLP for content summarization and pdf2html for dynamic content extraction

Wishlist Management Software Design Project (Java): “Starlight Wishes”

September - December 2022

Backend Developer (CSC207: Software Design) – Toronto, ON

- Designed and implemented a wishlist application for users to organize desired products from the web using Amazon API
- Maintained efficient progress using version control (Git), refactoring, code reviews, and comprehensive documentation
- Applied Clean Architecture techniques and SOLID design principles to create a scalable, maintainable system

CO-CURRICULAR ACTIVITIES

Students in Data Science and Statistics (SDSS) UofT

August 2023 - May 2025

Co-President and Co-Founder – Toronto, ON

- Co-founded and lead a 200+ member data science club; organized UofT's first datathon (100+ attendees) and built the club website to enhance engagement
- Developed club website (www.sdssuoft.com ) to enhance member engagement and streamline communication

SKILLS

- **Languages & Frameworks:** JavaScript (React, Angular), TypeScript, HTML/CSS, Python (Flask), Java
- **Tools & Technologies:** AWS, Docker, Vercel, MongoDB, Elasticsearch, PostgreSQL, MySQL, Git, Jira
- **Skills:** UI/UX Design, Design Systems, Responsive Components, Accessibility, Data Structures, Algorithms, Machine Learning, SOLID/OOP
